Your Dental Benefits Have Reset!

Important to Know for Your Dental Benefits

Most dental insurance plans reset on January 1st. If you've maxed out your savings in 2016, know that your plan may have reset, which can allow you to have the dental work you've been putting off!

If you've been thinking about improving your smile, or if you think you may need extra work maintaining your dental health, now is your opportunity! If you meet your deductible as early as possible this year, your insurance company will pay for more services throughout the rest of the year.

BOTTOM LINE:

Take advantage of your dental benefits resetting and make your first 2017 appointment with Alsbury Dental.

Dental Implants: Implant Your New Smile!

If you have missing teeth but don't want the discomfort or inconveniences that come with dentures and bridges, dental implants may be the ideal option for you. Dental implants are designed to replace missing teeth while blending in with natural teeth; most people won't be able to tell which tooth is the implant. Implants are an excellent long-term solution because they're made of titanium and are surgically placed in the upper or lower jaw, where they anchor replacement teeth.

For apprehensive patients who may be uncomfortable with extensive treatment, we offer IV sedation to help our patients feel more comfortable and relaxed. Best of all, many patients don't even remember their dental visit! We pride ourselves on being Burleson's very own IV and surgery center.
